Wood River Site #1 Chessen Lane Alton, IL 62002

Wood River Site ANNUAL CCR FUGITIVE DUST CONTROL REPORT

Reporting Year: 4th Quarter 2017 through 3rd Quarter 2018

Name

Completed by: Wanni Suhnu

Director, Decommissioning

Title

This Annual CCR Fugitive Dust Control Report has been prepared for the Wood River Site as required by 40 CFR 257.80(c). Section 1 provides a description of available actions that can be taken, if necessary, to control CCR fugitive dust at the facility during the reporting year. Section 2 provides a record of citizen complaints received concerning CCR fugitive dust at the facility during the reporting year and a summary of any corrective measures taken.

Section 1 Actions Taken to Control CCR Fugitive Dust

In accordance with the Wood River Site CCR Fugitive Dust Control Plan (Plan), the following measures would be implemented to control CCR fugitive dust from becoming airborne at the facility during the reporting year, if necessary:

| CCR Activity | Actions Taken to Control CCR Fugitive Dust |
|---|--|
| Management of CCR in the facility's CCR units | Wet management of CCR materials in CCR surface impoundments. |
| | Water areas of exposed CCR in CCR units. |
| | Naturally occurring grass vegetation in areas of exposed CCR in CCR surface impoundments. |
| Handling of CCR at the facility | CCR handled during closure activities of CCR surface impoundments remains conditioned during handling. |
| | Good housekeeping measures, such as sweeping or wetting, as needed. |

There were no CCR impoundment closure activities during the current reporting year. Based on a review of the Plan and inspections associated with CCR fugitive dust control performed in the reporting year, any necessary control measures identified in the Plan as implemented at the facility effectively minimized CCR from becoming airborne at the facility. No revisions or additions to control measures were needed to control CCR fugitive dust.

Wood River Site ANNUAL CCR FUGITIVE DUST CONTROL REPORT

The Wood River Site was permanently retired on May 31, 2016. Once the facility has completed decommissioning activities, the Plan will be amended to remove CCR fugitive dust control measures associated with CCR activities/systems that are no longer occurring/in operation.

Section 2 Record of Citizen Complaints

No citizen complaints were received regarding CCR fugitive dust at Wood River Power Plant in the reporting year.
