March 2022

Reporting Year: 4th Quarter 2020 through 3rd Quarter 2021

This Annual CCR Fugitive Dust Control Report has been prepared for CTI Development (the former Wood River site), as required by 40 CFR 257.80(c). Section 1 provides a description of available actions that can be taken, if necessary, to control CCR fugitive dust at the facility during the reporting year. Section 2 provides a record of citizen complaints received concerning CCR fugitive dust at the facility during the reporting year and a summary of any corrective measures taken.

SECTION 1 ACTIONS TAKEN TO CONTROL CCR FUGITIVE DUST

In accordance with CTI Development’s CCR Fugitive Dust Control Plan (Plan), the following measures would be implemented to control CCR fugitive dust from becoming airborne at the facility during the reporting year, if necessary:

CCR Activity	Actions Taken to Control CCR Fugitive Dust
Management of CCR in the facility’s CCR units	Wet management of CCR materials in CCR surface impoundments.
	Water areas of exposed CCR in CCR units.
	Naturally occurring grass vegetation in areas of exposed CCR in CCR surface impoundments.
Handling of CCR at the facility	CCR handled during closure activities of CCR surface impoundments remains conditioned during handling.
	Good housekeeping measures, such as sweeping or wetting, as needed.

During the reporting year, the former power plant demolition was completed. Excavation of the East Ash Pond and relocating the material to the West Ash Pond was continued. The Coal Yard was 95% cleaned, and the remaining area will be cleaned during final grading of West Ash Pond. Based on a review of the Plan and inspections associated with CCR fugitive dust control performed in the reporting year, and necessary control measures implemented at the facility, the site effectively minimized CCR from becoming airborne. No revisions or additions to control measures were needed to control CCR fugitive dust.

The Wood River Site, now owned by CTI Development, was permanently retired on May 31, 2016. Once decommissioning activities are completed, the Plan will be amended to

remove CCR fugitive dust control measures associated with CCR activities/ systems that are no longer occurring/ in operation.

SECTION 2 RECORD OF CITIZEN COMPLAINTS

No citizen complaints were received regarding CCR fugitive dust at the CTI Development site in the reporting year.
